

## ■ Features :

- Universal AC input / Full range
- Built-in active PFC function
- High efficiency up to 86%
- Protections: Short circuit / Overload / Over voltage / Over temperature
- Cooling by free air convection
- 1U low profile 36mm
- · Conformal coated
- ZVS technology to reduce power dissipation
- LED indicator for power on
- 3 years warranty

## **SPECIFICATION**

OUTPUT NUMBER   V1	MODEL		HDP-190		
RATED CURRENT ANADE (max.)		OUTPUT NUMBER	V1	V2	
CURRENT RANGE (max.)   0 - 40A   0 - 22A	ОИТРИТ	DC VOLTAGE	+3.8V	+2.8V	
NATED POWER   181.4W (typ.)   192W (max.)		RATED CURRENT	33A	20A	
NATED POWER   181.4W (typ.)   192W (max.)		CURRENT RANGE (max.)	0 ~ 40A	0~22A	
OUTPUT POWER (max.)   192W continue. V1 total power output shall not exceed 160W (max. 40A); V2 total power output shall not exceed 66W (max. 22A)				,	
OUTPUT POWER (max.)   OUTPUT POWER (max.)   Otto					
RIPPLE & NOISE (max.) Nota.2   100mVp-p

Ripple & noise are measured at 20MHz of bandwidth by using a 12" twisted pair-wire terminated with a 0.1uf & 47uf parallel capacitor.  3. Tolerance: includes set up tolerance, line regulation and load regulation.  4. The power supply is considered a component which will be installed into a final equipment. All the EMC tests are been executed by mounting the unit or a 360mm*360mm metal plate with 1mm of thickness. The final equipment must be re-confirmed that it still meets EMC directives. For guidance on how to perform these EMC tests, please refer to "EMI testing of component power supplies." (as available on http://www.meanwell.com)  5. Derating may be needed under low input voltages. Please check the derating curve for more details.		DIMENSION	215*115*36mm (L*W*H)		
NOTE  1. All parameters NOT specially mentioned are measured at 230VAC input, rated load and 25°C of ambient temperature.  2. Ripple & noise are measured at 20MHz of bandwidth by using a 12" twisted pair-wire terminated with a 0.1uf & 47uf parallel capacitor.  3. Tolerance: includes set up tolerance, line regulation and load regulation.  4. The power supply is considered a component which will be installed into a final equipment. All the EMC tests are been executed by mounting the unit or a 360mm*360mm metal plate with 1mm of thickness. The final equipment must be re-confirmed that it still meets EMC directives. For guidance on how to perform these EMC tests, please refer to "EMI testing of component power supplies." (as available on http://www.meanwell.com)  5. Derating may be needed under low input voltages. Please check the derating curve for more details.		PACKING	0.95Kg; 15pcs/15.3Kg/0.7CUFT		
	NOTE
